HOT AIR FURNACES

PETER MARTIN'S Patent Improved

Hot Air Furnaces, FOR PUBLIC AND PRIVATE USE.

For Wood or Coal.

THE ATTENTION OF THE PUBLIC T is called to the above Furnaces, as they combine ventilating with heating qualities.

The inventor has, after years of experiments, succeeded in perfecting what he claims to be the best Furnace now in use. Among its many advantages over the ordinary Furnaces, are:

The small amount of Fuel required to keep it in acception. The small amount of Fuel required to keep it in operation.

Keeping the rooms constantly supplied with pure, fresh air, drawn from Nature's inexhaustible stock out of doors.

Large Air Chambers, avoiding the confinement of heat in heated waits and hot metal chambers.

Improved Water Chambers, which keep up a steady supply of moisture, which keep up a steady supply of moisture, which overcomes the great objection to ordinary Hot Air Furnaces.

The castings are heavy, and strongly bolted together, guaranteeing durability under any degree of heat.

Particular attention is called to the SELF-REGULATING ARRANGEMENT of this Furnace, which has been pronounced by scientific men to be the

BEST EVER MADE. AT Every Furnace warranted to give entire satisfaction. REFERENCES:

By permission I refer to the following parties, where the Furnaces are in operation: By permission I refer to the following parties, where the Furnaces are in operation:

CINGINNATI, March 17, 1863,
Mr. P. Martin, of this city, has constructed a "Hot Air Furnace" in the Second Reformed Church (corner Findlay and Ba miller streets), which has thus far given entire satisfaction. For efficiency in warming, purity of air, and economy of fuel, we can appeal of it in most favorable terms. Its permanency and durability also seem to promise well. The plan of draught and ventilation is good.

From our experience, we can recommend Mr. Martin as an adept in the art of warming buildings, and as quite competent to give satisfaction in the construction of Furnaces, wherever practicable.

Trustees of the Church of the Cross.

SAMUEL MEASE, Pastor.

Mr. Notre Dame, Reading, Ohio. MR. MARTIN:—This is to certify that we tried the Furnace you built for us, and are satisfied with it. Our rooms are amply heated.

EDWARD M. MORGAN, 2 Pine street, N. Y. THE SUBSCRIPTION IS SO NEARLY completed that it is intended to close the same on or before the 12th of February.

Subscriptions, \$750,000, of which \$600,000 purchases the land-to-wit: 62,860 neres. The remaining

\$150,000 is the permanent cash working capital of the Company.

Par value of shares, \$100. Lands located on the Little Kanawha and Elk Rivers, in the countles of Gilmer and Braxton, in the very heart of the oil re-gions of West Virginia.

Professor Richardson reports: "Your property is the very centre of the West Virginia oil regions. It

has numerous oil and gas springs along the banks of its streams, one of which vies with the famous 'Burning Spring' itself,"
Professor Shapherd, of New Haven, Conn., reports: "I consider it eminently oil-producing land.
The oil-bearing shales underlie it extensively, and the long lines of carburetted hydrogen, or illuminat-ing gas springs, some of which I saw burning, as

well as the appearance of all itself on the surface of the tract, fully confirms me in this belief. There can be no doubt that along your creeks and tributaries there is a large extent of valuable oilproducing territory. The prodicious amount of bituminous and cannel coal, iron ere, limestone and fire clays embodied in the high hills on your property, the tops and slopes of which are covered with an extraordinory growth of while oak and other heavy timbers, add imminsely to its value." These views are fully indersed by the reports of the most practical and experienced men from the oil districts of both Pennsylvania and Virginia. The Company consider themselves fortunate having secured the services of Mr. Blackwell, a practical civil engineer, for the general superintend-ency, so well known as the late Chief Engineer and

ency, so well known as the late Chief Engineer and Superintendent of the "Commissioners of Washington Heights," New York City.

Arrangements are in rapid progress for the immediate development of the property, on a scale commensurate with its value and extent.

Subscriptions payable at the time of subscribing, or one-half in cash, the balance in thirty days from the time of closing the subscription, can be made in person or by letter at the office of the understaned, No 61 Cedar street, New York; J. K. DOBSON, No. 42 State street, Beston; and JOHN W. STRONG, Detroit, Michigan, where full information can be obtained.
